Brooks EEZE

**Low starch, high fibre and fat
for everyday fitness and health**

(Textured)

A Kentucky Equine Research Formulated Feed

*Fortified with Brooks exclusive
Oxiguard system of natural source
 Vitamin E and organic selenium!*

*Bioavailable Vitamin E and organic selenium
 work synergistically as effective antioxidants to
 minimize muscle soreness and fatigue.*

*Our commitment to quality
 drug free manufacturing is
 your satisfaction guarantee!*

Guaranteed Analysis

Crude Protein (min.)	12 %
Crude Fat (min.)	10 %
Crude Fibre (max.)	15 %
Calcium (min.)	.80 %
Phosphorus (min.)	.70 %
Sodium (min.)	.35 %
Copper (act.)	50 ppm.
Zinc (act.)	150 ppm.
Vitamin A (min.)	11000 IU/KG.
Vitamin D (min.)	1250 IU/KG.
Vitamin E (min.)	300 IU/KG.
Selenium	.45 ppm.

❖ *NSC (Reduced)*

Features and Benefits of EEZE

❖ **Formulated with highly digestible fibre and fat sources including rice bran.**

The level of sugar and starch in the formulation has been significantly reduced to maximize the positive effects of non NSC sources such as high quality fibres and fats and produce a high calorie density.

Balanced vitamin and chelated mineral content

Supplies micronutrient fortification not found in forages and eliminates the need for expensive supplements. Chelated minerals are more readily and thoroughly absorbed for improved health and performance.

Manufactured with a proprietary form of Saccharomyces Cerevisiae a prebiotic with a wide body of research.

The addition of a proprietary yeast culture improves digestion of fibre and promotes more efficient use of nutrients.

Contains a full complement of B Vitamins and amino acids

Meets all of the daily maintenance requirements for B Vitamins including biotin and provides full spectrum of essential amino acids

Formulation is fixed

A fixed formula means that we do not substitute inferior low cost ingredients for superior ingredients to lower the cost of production.

Brooks EEZE is formulated with carefully selected ingredients to ensure maximum palatability and consistency.

EEZE Description

EEZE is a performance feed for horses active in high intensity disciplines requiring large amounts of energy with a reduced carbohydrate level. EEZE draws energy primarily from digestible (super) fibres and high quality fats including rice bran. The low glyceimic formula of EEZE makes it ideal for horses prone to *REER (Recurrent Exertional Rhabdomyolysis), PSSM (Polysaccharide Storage Myopathy), Cushings or laminitis*, particularly where weight gain is desired in a low soluble carbohydrate formula.

EEZE has earned a reputation among many top trainers and owners for supplying low glyceimic energy with complete balanced nutrition in a palatable form that helps keeps horses training every day.

Feeding Suggestions

Feed horses according to level and type of activity and to maintain ideal body condition

Mature Weight	900 lbs. (400 kg.)	1100 lbs. (500 kg.)	1320 lbs. (600 kg.)
Light work *	4-8 lbs. (1.8-3.6 kg.)	6-10 lbs. (2.75-4.5 kg.)	7-12 lbs. (3.2-5.5 kg.)
Moderate work **	5-10 lbs. (2.25-4.5 kg.)	7-12 lbs. (3.2-5.45 kg.)	8-14 lbs. (3.6-6.40 kg.)
Heavy work ***	6-11 lbs. (2.70-5.0 kg.)	8-13 lbs. (3.6-5.9 kg.)	9-16 lbs. (4.0-7.25 kg.)

* ie. jogging, trail riding, pleasure etc.

** ie. dressage, jumping, cutting, roping etc.

*** ie. racing, polo, eventing etc.

Note: Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site.

Amount of feed required is dependent on the body condition, the metabolism and the type of activity the horse is used for. For each pound of *EEZE* fed daily below ½ pound per 100 pounds of the horse's bodyweight add ¼ pound (115 grams) *Brooks Enhancer or All Phase 20*. For specific recommendations consult a Brooks Feed representative or submit a request on-line using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of the horse's bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to the quality of hay or pasture. Hay analysis is recommended to ensure a balanced ration.

A list of ingredients is available by contacting the manufacturer.
