Brooks Enhancer

pelleted

A versatile pelleted supplement
nutritionally balanced for
all classes of horses

- ✓ Flexible feeding rate to match the requirement!
- ✓ Ideal for balancing the “easy keepers” diet!
- ✓ Low inclusion rate minimizes NSC intake for metabolically challenged horses!

Our commitment to quality and drug free manufacturing is your satisfaction guarantee

Guaranteed Analysis

Crude Protein (min)	12 %
Crude Fat (min)	2 %
Crude Fibre (max.)	15 %
Calcium (act.)	3.0 %
Phosphorus (act.)	2.0 %
Copper (act.)	205 ppm.
Zinc (act.)	580 ppm.
Sodium (act.)	1.2 %
Vitamin A (min.)	55000 IU/KG.
Vitamin D (min.)	7500 IU/KG.
Vitamin E (min.)	900 IU/KG.
Selenium (min. added)	2.0 ppm.

❖ *NSC level (reduced)*

Features and Benefits of Enhancer

Moderate caloric density and low in non-structural carbohydrates.

❖ *The level of sugar and starch in the formulation has been significantly reduced to maximize the positive effects of non NSC sources such as high quality fibres and fats. Ideal to balance metabolically challenged diets because of the low inclusion rate.*

Contains essential vitamins and chelated minerals.

Chelated minerals are more readily and thoroughly absorbed for improved performance and health. Vitamins including B-complex and biotin help to ensure long-term health.

Feeding rate is flexible according to the horse's requirements.

Basic feeding rate of 1 pound per 1000 pounds of bodyweight can be adjusted according to the type of horse and the existing ration.

Manufactured with a proprietary form of Saccharomyces Cerevisiae a prebiotic with a wide body of research.

The addition of a proprietary yeast culture improves digestion of fibre and promotes more efficient use of nutrients.

Contains a full complement of B Vitamins

Meets all of the daily maintenance requirements for B Vitamins including biotin.

Enhancer is formulated with carefully selected ingredients to ensure maximum palatability and consistency.

Enhancer Description

Enhancer is a versatile pelleted supplement formulated to supply a complete nutritional balance to rations not containing a recommended amount of a Brooks complete feed. Enhancer provides a full complement of vitamins and highly available macro and trace minerals to ensure horses do not develop any long-term nutritional deficiencies. The low non-structural carbohydrate formulation (low glycemic) makes Enhancer ideally suited to balance a ration for metabolically challenged horses such as those with *Equine Metabolic Syndrome*, *Cushings* or *laminitis* where total calories particularly from starch and sugar must be limited.

Enhancer is palatable whether fed alone or top-dressed on other feeds.

Feeding Suggestions

The feeding rate of Enhancer is dependent on the type of horse fed. Where another source of minerals and vitamins is fed the amount of Enhancer can be reduced proportionately.

Mature Weight	880 lbs. (400 kg.)	1100 lbs. (500 kg.)	1320 lbs. (600 kg.)
Maintenance	.9 - 1.0 lbs. (.4 - .45 kg.)	1.1 - 1.20 lbs. (.5 - .55 kg.)	1.3 - 1.4 lbs. (.6 - .65 kg.)
Light work	1.1 - 1.3 lbs. (.5 - .6 kg.)	1.4 - 1.75 lbs. (.65 - .8 kg.)	1.75 - 2.0 lbs. (.8 - 1.0 kg.)
Broodmares			
Early gestation (1 st 8 months)	1.0 lbs. (.45 kg.)	1.2 lbs. (.55 kg.)	1.4 lbs. (.65 kg.)
Late Gestation (last 3 months)	1.3 lbs. (.6 kg.)	1.75 lbs. (.8 kg.)	2.2 lbs. (1 kg.)
Stallion			
Non breeding	1.0 lbs. (.45 kg.)	1.2 lbs. (.55 kg.)	1.40 lbs. (.65 kg.)
Breeding	1.3 lbs. (.6 kg.)	1.75 lbs. (.8 kg.)	2.2 lbs. (1.0 kg.)

Enhancer can be used as part of a ration for growing horses where less than the recommended rate of Phase I or Phase II is fed. Feed .25 (1/4) pound of Enhancer for each pound of Phase I or Phase II fed less than the recommended amount.

Do not exceed recommended amounts. Contact a Brooks Feed representative for specific information.

Note: Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site for specific directions.

Amount of feed required is dependent on the body condition, the metabolism and the type of activity that the horse is used for. For each pound of a Brooks complete ration fed daily reduce the amount of **Enhancer** by .25 (1/4) pound (.11 kg.) For specific recommendations consult a Brooks Feed representative or submit a request on-line using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount varies according to the quality of hay or pasture. Hay analysis is recommended to ensure a balanced ration.

A list of ingredients is available by contacting the manufacturer.
