

Enhancer

Pelleted

A low-calorie balancer pellet ensures proper mineral/vitamin fortification when less than recommended rate of complete feed is fed.

Features and Benefits

- ✓ Contains essential vitamins and *chelated minerals* which are readily and thoroughly absorbed for improved performance and health. Added vitamins including B-complex and biotin help to ensure long-term health.
- ✓ A *moderate calorie density*, reduced NSC (non-structural carbohydrates) and a low inclusion rate make Enhancer ideal to balance metabolically challenged diets where weight gain is not required.
- ✓ The addition of a *proprietary yeast culture* *Saccharomyces Cerevisiae* improves digestion of fibre and promotes more efficient use of nutrients.
- ✓ A *moderate protein level* makes Enhancer an excellent choice to provide the necessary minerals and vitamins on pasture or where higher protein hay is fed.
- ✓ A *flexible feeding rate* allows for precise ration balancing according to current feedstuffs and the unique requirement of all classes of horses including growing, breeding and metabolically challenged horses.
- ✓ A palatable pelleted format eliminates possible separation of nutrients and reduces waste.

Enhancer is a fixed formula manufactured in a drug free environment!

Enhancer Description

Enhancer is a versatile pelleted supplement formulated to supply a complete nutritional balance to rations not containing a recommended amount of a Brooks complete feed. Enhancer provides a full complement of vitamins and highly available macro and trace minerals to ensure horses do not develop any long-term nutritional deficiencies. The low non-structural carbohydrate formulation (low glycemic) makes Enhancer ideally suited to balance a ration for metabolically challenged horses such as those with *Equine Metabolic Syndrome, Cushings or laminitis* where total calories particularly from starch and sugar must be limited.

Enhancer is palatable whether fed alone or top-dressed on other feeds.

Feeding Suggestions

The feeding rate of Enhancer is dependent on the type of horse fed. Where another source of minerals and vitamins is fed the amount of Enhancer can be reduced proportionately.

Mature Weight	880 lbs. (400 kg.)	1100 lbs. (500 kg.)	1320 lbs. (600 kg.)
Maintenance	.9 - 1.0 lbs. (.4 - .45 kg.)	1.1 - 1.2 lbs. (.5 - .55 kg.)	1.3 - 1.4 lbs. (.6 - .65 kg.)
Light work	1.1 - 1.3 lbs. (.5 - .6 kg.)	1.4 - 1.75 lbs. (.65 - .8 kg.)	1.75 - 2.0 lbs. (.8 - 1.0 kg.)
Broodmares			
Early gestation (1 st 8 months)	1.0 lbs. (.45 kg.)	1.2 lbs. (.55 kg.)	1.4 lbs. (.65 kg.)
Late Gestation (last 3 months)	1.3 lbs. (.6 kg.)	1.75 lbs. (.8 kg.)	2.2 lbs. (1.0 kg.)
Stallion			
Non-breeding	1.0 lbs. (.45 kg.)	1.2 lbs. (.55 kg.)	1.4 lbs. (.65 kg.)
Breeding	1.3 lbs. (.6 kg.)	1.75 lbs. (.8 kg.)	2.2 lbs. (1.0 kg.)

Enhancer can be used as part of a ration where less than the recommended rate of complete feed is fed. Feed .25 (1/4) pound (115 grams) of Enhancer for each pound of complete feed fed less than the recommended minimum amount.

Do not exceed recommended amounts. Contact a Brooks Feed representative for specific information.

Note: Warmblood and Draft type horses may require different amounts from light horse breeds.

Contact a Brooks Feed representative or submit a request on our interactive web site for specific directions.

Amount of feed required is dependent on the body condition, the metabolism and the type of activity that the horse is used for. For each pound of a Brooks complete ration fed daily reduce the amount of *Enhancer* by .25 (1/4) pound (.11 kg.) For specific recommendations consult a Brooks Feed representative or submit a request online using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount varies according to the quality of hay or pasture. Hay analysis is recommended to ensure a balanced ration. Contact your retailer or Brooks Nutrition Advisor.

A list of ingredients and full nutritional analysis is available by contacting the manufacturer.
