Fibrelite

Fibrelite is a complete ration with an enhanced fibre content from highly digestible sources including beet pulp. Fibrelite is suitable as a partial hay replacer or as a light concentrate for easy keepers.

Available in a pelleted chunk form.

Fortified with Brooks exclusive **Oxiguard** system of natural source Vitamin E and organic selenium!

Bioavailable Vitamin E and organic selenium work synergistically as effective antioxidants to minimize muscle soreness and fatigue.

Our commitment to quality drug free manufacturing is your satisfaction guarantee!

Guaranteed Analysis

Crude Protein (min.)	12.5 %	Crude Fibre (max.)	25%
Crude Fat (min.)	3.0 %	Vitamin A (min.)	8500 IU/kg.
Calcium (act.)	.85 %	Vitamin D (min.)	1100 IU/kg.
Phosphorus (act.)	.45 %	Vitamin E (min.)	120 IU/kg.
Sodium (act.)	.30 %	Copper	35 mg/kg.
Selenium (min. added)	.30 mg/kg.		

❖ *NSC (very low)*

Features and Benefits of Fibrelite

Formulated with built in digestible fibre sources including beet pulp, soy hulls and alfalfa meal!

Suitable for horses on hay restricted diets such as those suffering from allergies, chronic obstructive pulmonary disease or where a sufficient supply of hay is unavailable.

❖ **Moderate energy high fibre with a very low nonstructural carbohydrate content!**

Suitable for use as a light concentrate for maintenance, easy keepers, or to add extra fibre to a ration. Also suitable as a concentrate for horses with metabolic issues such as Equine Metabolic Syndrome, PSSM, or Cushings disease.

Contains stabilized flax meal and stabilized rice bran!

Flax is a rich source of Omega 3 fatty acids to enrich the hair coat contribute to healthy hooves, support the immune system and provide anti-inflammatory support. Rice bran is a good source of digestible fibre and fat.

Convenient chunk form!

Convenient chunk form reduces the rate of intake, is easy to soak for aged horses with poor teeth or horses prone to choke and is dust free for horses with breathing issues.

Fortified with chelated minerals and a full complement of vitamins including biotin!

Mineral and vitamin fortification complements the minerals and vitamins in forages. When fed at recommended rates no supplementation is necessary. Senior horses are better able to utilize minerals in a chelated form.

Fibrelite is formulated with carefully selected ingredients to ensure maximum palatability and consistency.

Fibrelite Description

Fibrelite is an enhanced fibre feed for use as a moderate energy concentrate or as a partial hay replacer. Fibrelite an excellent choice for horses needing a concentrate with a very low sugar and starch level. Fibrelite draws energy primarily from high quality fibre sources without “filler fibres” common in lower quality feeds. The very low non-structural carbohydrate level also makes Fibrelite a good choice for horses diagnosed with *Cushings, Polysaccharide Storage Myopathy, insulin resistance, excitability, or chronic laminitis*. Fibrelite can be used as a partial substitute for hay where sufficient hay is unavailable or must be restricted due to allergies, or Chronic Obstructive Pulmonary Disease. Fibrelite is best soaked prior to feeding.

Fibrelite supplies total nutrition in a palatable chunk form that horses take to readily and stay on during training, competing or pleasure riding while outperforming similar competitive products. *Fibrelite can be conveniently soaked for older horses with poor teeth or horses prone to choke.*

Feeding Suggestions

Feed horses according to level and type of activity and to maintain ideal body condition

Mature Weight	900 lbs. (400 kg.)	1100 lbs. (500 kg.)	1300 lbs. (600 kg.)
Idle horses	4-6 lbs. (1.8-2.75 kg.)	5-7 lbs. (2.25-3.2 kg.)	6-8 lbs. (2.75-3.60 kg.)
Light work	6-8 lbs. (2.75-3.60 kg.)	7-9 lbs. (3.2-4.0 kg.)	8-10 lbs. (3.60-4.50 kg.)

As a hay replacer substitute one to one by weight for hay. Horses with limited hay may show signs of boredom or develop undesirable habits. A minimum of 1% of bodyweight in forage is recommended.

Note: Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site.

Amount of feed required is dependent on the body condition, the metabolism and the type of activity the horse is used for. For each pound of *Fibrelite* fed daily below ½ pound per 100 pounds of the horse’s bodyweight add ¼ pound (115 grams) *Brooks Enhancer or All Phase 20*. For specific feeding suggestions consult a Brooks Feed representative or submit a request on-line using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of the horse’s bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to the quality of hay or pasture. Hay analysis is recommended to ensure a balanced ration.

A list of ingredients is available by contacting the manufacturer.
