# Fit & Fibre Description

Fit & Fibre is a fibre and fat based feed suitable for a wide range of horses. The low glycemic, controlled NSC formula with added fat makes Fit & Fibre an excellent choice for horses needing a moderate amount of controllable energy. Fit & Fibre draws energy primarily from high quality fibre sources without excessive “filler fibres” common in lower quality feeds and added fat to increase the energy level. Controlled starch and sugar levels also make Fit & Fibre a good choice for horses diagnosed with metabolic issues. Fit & Fibre supplies total nutrition in a palatable textured or pelleted form that horses take to readily and stay on during training, competing or pleasure riding while outperforming comparably priced competitive products.

Amount of feed required is dependent on the body condition, the metabolism and the type of activity the horse is used for. For each pound of **Fit & Fibre** fed daily below  $\frac{1}{2}$  pound per 100 pounds of the horse's bodyweight add  $\frac{1}{4}$  pound (115 grams) **Brooks Enhancer or All Phase 20**. For specific feeding suggestions consult a Brooks Feed representative or submit a request online using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of the horse's bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to the quality of hay or pasture. Hay analysis is recommended to ensure a balanced ration.
