

Pacemaker X

Extruded feed for
 performance horses

Features and Benefits

- ✓ Formulated with a **blend of energy sources** with an emphasis on rapidly available carbohydrates and added fat supports maximum speed and power.
- ✓ **Extruded component** improves the digestibility of starch, slows feed intake, and allows for higher fat inclusion.
- ✓ A **well-balanced level of vitamins and chelated minerals** provide micronutrient fortification lacking in forages alone and eliminates the need for expensive supplements when fed at recommended levels.
- ✓ A proprietary form of *Saccharomyces Cerevisiae*, a **prebiotic** with a wide body of research improves digestion of fibre and promotes more efficient use of nutrients.
- ✓ A full complement of B Vitamins including biotin supplies the daily maintenance requirements and a full spectrum of essential amino acids supplies protein for performance and muscle repair.
- ✓ Brooks **Oxiguard** System of natural source Vitamin E and organic selenium work synergistically as effective antioxidants to minimize muscle soreness and fatigue.

Pacemaker X is a fixed formula manufactured
 in a **drug free** environment!

Guaranteed Analysis

Crude Protein (min.)	13.00 %
Crude Fat (min.)	8.00 %

Pacemaker X Description

Pacemaker X is a research leading extruded performance feed for horses active in high intensity disciplines requiring large amounts of energy. Pacemaker X draws energy primarily from carbohydrates and fat from soy oil. Pacemaker X has an optimum starch and sugar content for high intensity exercise requiring readily available energy from soluble carbohydrates combined with stamina producing fat energy. Extrusion enhances the digestibility of carbohydrates while slowing intake.

Pacemaker X has earned a reputation among many top trainers and owners for supplying total nutrition in a palatable form that horses take to readily and stay on during competition or training.

Feeding Suggestions

Feed horses according to level and type of activity and to maintain ideal body condition

Mature Weight	900 lbs. (400 kg.)	1100 lbs. (500 kg.)	1320 lbs. (600 kg.)
Light work *	4.0 – 8.0 lbs. (1.8-3.6 kg.)	6.0 – 10.0 lbs. (2.75-4.5 kg.)	7.0 – 12.0 lbs. (3.2-5.5 kg.)
Moderate work **	5.0 – 10.0 lbs. (2.25-4.5 kg.)	7.0 – 11.0 lbs. (3.2-5.45 kg.)	8.0 – 14.0 lbs. (3.6-6.40 kg.)
Heavy work ***	6.0 – 11.0 lbs. (2.70-5.0 kg.)	8.0 – 13.0 lbs. (3.6–5.9 kg.)	9.0 – 16.0 lbs. (4.0-7.25 kg.)

* ie. jogging, trail riding, pleasure etc.

** ie. dressage, jumping, cutting, roping etc.

*** ie. racing, polo, eventing etc.

Note: Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site.

Amount of feed required is dependent on the body condition, the metabolism and the type of activity that the horse is used for. For each pound of *Pacemaker X* fed daily below ½ pound per 100 pounds of the horse's bodyweight add ¼ pound (115 grams) *Brooks Enhancer or All Phase 20*. For specific feeding recommendations consult a Brooks Feed representative or submit a request on-line using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of the horse's bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to the quality of hay or pasture. Hay analysis is recommended to ensure a balanced ration.

A list of ingredients is available by contacting the manufacturer.
