Phase III Elite Description

Phase III Elite is a performance feed for horses active in high intensity disciplines requiring large amounts of energy. While a blend of energy sources is included, rapidly available carbohydrates are emphasized to support maximum speed and power. Phase III Elite also has enhanced higher fat levels from soy oil, flax, and rice bran to substantially increase the overall energy level. Phase III Elite is formulated for hard working athletic horses requiring maximum energy from various sources in a very palatable form.

Many top trainers have demonstrated the performance quality, the palatability, and the total nutritional value of Phase III Elite. Horses take to Phase III Elite readily and stay on it through rigorous training and competition.

Amount of feed required is dependent on the body condition, the metabolism and the type of activity the horse is used for. For each pound of **Phase III Elite** fed daily below $\frac{1}{2}$ pound per 100 pounds of the horse's bodyweight add $\frac{1}{4}$ pound (115 grams) **Brooks Enhancer or All Phase 20**. For specific recommendations consult a Brooks Feed representative or submit a request online using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of the horse's bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to the quality of hay or pasture. Hay analysis is recommended to ensure a balanced ration.
