

Phase II

Low glycemic growth
 and conditioning formula
 for yearlings and broodmares

(pelleted or textured)

Fortified with Brooks exclusive
Oxiguard system of natural source
 Vitamin E and organic selenium!

Bioavailable Vitamin E and organic selenium
 work synergistically as effective antioxidants to
 minimize muscle soreness and fatigue.

Our commitment to quality
 drug free manufacturing is
 your satisfaction guarantee!

Guaranteed Analysis

Crude Protein (min)	14 %
Crude Fat (min)	6 %
Crude Fibre (max.)	12 %
Calcium (act.)	.85 %
Phosphorus (act.)	.70 %
Copper (act.)	50 ppm.
Zinc (act.)	150 ppm.
Sodium (act.)	.4 %
Vitamin A (min.)	12150 IU/KG.
Vitamin D (min.)	1215 IU/KG.
Vitamin E (min.)	250 IU/KG.
Selenium (min. added)	.45 ppm.

NSC level (Controlled) Nutritional profile of pelleted Phase II may vary slightly.

Features and Benefits of Phase II

Formulated with high quality protein and energy sources.

Provides appropriate amino acid balance and energy levels for growing horses and broodmares in late gestation and lactation.

Formulated with highly digestible fibre and fat sources.

❖ *The positive effects of non NSC energy sources (fibre, fat) are maximized while a controlled level of soluble carbohydrates are included to fully support growth.*

Balanced vitamin and chelated mineral content

Encourages sound skeletal growth and provides essential vitamin and mineral fortification for broodmares and yearlings. Chelated minerals are more thoroughly absorbed for improved performance and health.

Manufactured with a proprietary form of Saccharomyces Cerevisiae a prebiotic with a wide body of research.

The addition of a proprietary yeast culture improves digestion of fibre and promotes more efficient use of nutrients.

Contains a full complement of B Vitamins and amino acids

Meets all of the daily maintenance requirements for B Vitamins including biotin and provides full spectrum of essential amino acids.

Textured and pelleted Phase II are formulated with a fixed formula of carefully selected ingredients to ensure maximum palatability .

Phase II Description

Phase II is a scientifically formulated growing ration suitable for yearlings and broodmares. Phase II is a result of substantial research undertaken to develop the best possible nutritional profile for growing horses prone to developmental orthopedic diseases (DOD). Phase II draws energy largely from digestible fibre sources called “super fibres” and high quality fat (primarily soy oil). Phase II has a controlled starch and sugar level in keeping with research showing the benefits of a “low glycemic” diet for growing horses. The mineral profile including organic (chelated) trace minerals provides highly available bone building minerals to complement an ideal amino acid (protein) profile.

Phase II with Flax Appeal provides superior broodmare nutrition necessary to produce healthy active foals and maintain an adequate lactation level to support growth, and condition the mare for rebreeding.

Phase II supplies total nutrition in a very palatable textured or pelleted form that horses take to readily.

Feeding Suggestions

Mature Weight	900 lbs. (400 kg.)	1100 lbs. (500 kg.)	1300 lbs. (600 kg.)
*Yearlings (12-24 months)	7.0-12.0 lbs. (3.5-5.5 kg.)	9.0-12.5 lbs. (4.0-6.0 kg.)	9.0-13.0 lbs. (4.0-6.5 kg.)
*2 year olds (24 months)	6.5-9.0 lbs. (3.0-4.0 kg.)	9.0-12.5 lbs. (4.0-6.0 kg.)	10.0-13.0 lbs. (4.5-6.5 kg.)
*Caution – Faster growing animals may be more susceptible to DOD. Do not overfeed.			
Mares (mature)			
Barren/early gestation	3.5-5.5 lbs. (1.5-2.5 kg.)	3.5-6.5 lbs. (1.5-3.0 kg.)	5.5-8.0 lbs. (2.5-3.5 kg.)
Late gestation	6.5-9.0 lbs. (3.0-4.0 kg.)	8.0-10.0 lbs. (3.5-4.5 kg.)	9.0-11.0 lbs. (4.0-5.0 kg.)
Lactation	10.0-13.0 lbs. (4.5-6.5 kg.)	11.0-15.0 lbs. (5-7 Kg.)	12.0-16.0 lbs. (5.5-7.5 kg.)

Note: Growing Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site.

Amount of feed required is dependent on the body condition, the metabolism and the rate of growth expected. Proper intake of minerals and vitamins is extremely important for growing horses. *Brooks Enhancer or All Phase 20 should be added to the ration when less than the recommended amount is fed.* Provide fresh clean water and free choice salt at all times in addition to a minimum of 1% of the horse’s bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to quality of hay. Hay analysis is recommended. Adjust the amount fed according to quantity and quality of pasture while ensuring adequate minerals and vitamins are provided. Consult a Brooks Feed representative or submit a request on-line using our interactive feeding guide for information. Growth monitoring of growing horses using a tape or scale recommended.

A list of ingredients is available by contacting the manufacturer.
