# Phase II

Pelleted or textured

Low glycemic growth and conditioning formula for yearlings and broodmares

## Features and benefits of Phase II

- ✓ **High quality protein and energy** sources provide ideal levels of amino acids to encourage safe growth with an appropriate calorie density for growing yearlings and broodmares during gestation & lactation.
- ✓ Highly digestible fibre and fat maximize the positive effects of non NSC energy sources while a measured level of soluble carbohydrates help to fully support growth.
- ✓ The addition of **stabilized flax** adds greater calorie density and valuable Omega 3 fatty acids.
- ✓ A **well-balanced level of vitamins and chelated minerals** encourage sound skeletal growth and help prevent developmental problems related to nutrition. Chelated minerals are more readily and thoroughly absorbed for improved performance and health.
- ✓ A proprietary form of *Saccharomyces Cerevisiae* a **prebiotic** with a wide body of research improves digestion of fibre and promotes more efficient use of nutrients.
- ✓ Brooks **Oxiguard** System of natural source Vitamin E and organic selenium are important nutrients for muscle development and strength.
- ✓ Supplies the daily maintenance requirements for B Vitamins are including biotin.

Phase II is a **fixed formula** manufactured in a drug free environment.

## Guaranteed Analysis

Crude Protein (min.)	14.00 %
Crude Fat (min.)	8.00 %
Crude Fibre (max.)	12.00 %
Calcium (act.)	.80 %
Phosphorus (act.)	.60 %
Magnesium (act.)	.31 %
Manganese (act.)	90 mg/kg.
Copper (act.)	50 mg/kg.
Zinc (act.)	130 mg/kg.
Sodium (act.)	.45 %
Vitamin A (min.)	11050 IU/KG.
Vitamin D (min.)	1105 IU/KG.
Vitamin E (min.)	315 IU/KG.
Selenium (min. added)	.47 ppm.

## Nutritional Enhancements \*full analysis available

Biotin	.33 mg/kg.
Thiamine	12.6 mg/kg.
Riboflavin	13.0 mg/kg.
Omega 3 fatty acids	.45 %
Omega 6 fatty acids	3.06 %
Lysine	.68 %

## Saccharomyces cerevisiae

Textured format shown

## Ingredients

Oats, Wheat shorts, Barley, Soybean meal, Molasses, Alfalfa meal, Soy Hulls, Stabilized flax meal, Soy oil, Dical Biophos, Salt, Limestone, Pellet binder, Natural Source Vitamin E, Yea Sacc, Choline Chloride, Zinc Sulfate, Ferrous Sulfate, Zinc Proteinate, Copper Proteinate, Manganese Proteinate, Manganese Sulfate, Copper Sulfate, Sodium Selenite, Folic Acid, d-Calcium Pantothenate, Choline Chloride, Riboflavin Supplement, Vitamin A Supplement, Vitamin E Supplement, Vitamin B12 Supplement, Thiamine Mononitrate, d-Biotin, Niacin Supplement, Menadione Sodium Bisulfite Complex, Pyridoxine Hydrochloride, Calcium Iodate, Vitamin D3 Supplement, Limestone carrier.

## Phase II Description

Phase II is a scientifically formulated growing ration suitable for yearlings and broodmares. Phase II is a result of substantial research undertaken to develop the best possible nutritional profile for growing horses prone to developmental orthopedic diseases (DOD). Phase II draws energy largely from digestible fibre sources called “super fibres” and high-quality fat (primarily soy oil with the valuable addition of stabilized flax). In keeping with research showing the benefits of a “low glycemic” diet the starch and sugar levels are appropriate for growing horses. The mineral profile including organic (chelated) trace minerals provides highly available bone building minerals to complement an ideal amino acid profile.

**Phase II with Flax Appeal** provides superior broodmare nutrition necessary to produce healthy active foals and maintain an adequate lactation level to support growth and condition the mare for rebreeding.

Phase II supplies total nutrition in either a very palatable textured or a pelleted form that horses take to readily.

### Feeding Suggestions

Mature Weight	900 lbs. (400 kg.)	1100 lbs. (500 kg.)	1320 lbs. (600 kg.)
*Yearlings (12-24 months)	6.5 - 11.0 lbs. (3.0 - 5.0 kg.)	7.75 - 12.0 lbs. (3.5 - 5.5 kg.)	7.75 - 13.0 lbs. (3.5 - 6.0 kg.)

**\*Caution – Faster growing animals may be more susceptible to DOD. Do not overfeed.**

#### Mares (mature)

Barren/early gestation	2.25 - 4.4 lbs. (1.0 - 2.0 kg.)	2.25 - 5.5 lbs. (1.0 - 2.5 kg.)	4.4 - 6.5 lbs. (2.0 - 3.0 kg.)
Late gestation	5.5 - 7.75 lbs. (2.5 - 3.5 kg.)	6.5 - 8.75 lbs. (3.0 - 4.0 kg.)	7.75 - 10.0 lbs. (3.5 - 4.5 kg.)
Lactation	8.75 - 13.0 lbs. (4.0 - 6.0 kg.)	10.0 - 14.25 lbs. (4.5 - 6.5 Kg.)	11.0 - 15.25 lbs. (5.0 - 7.0 kg.)

**Note: Growing Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site.**

Amount of feed required is dependent on the body condition, the metabolism and the rate of growth expected. Proper intake of minerals and vitamins is extremely important for growing horses. **Brooks Enhancer or All Phase 20 should be added to the ration when less than the recommended amount is fed.** Provide fresh clean water and free choice salt at all times in addition to a minimum of 1% of the horse's bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to quality of hay. Hay analysis is recommended. Adjust the amount fed according to quantity and quality of pasture while ensuring adequate minerals and vitamins are provided. Consult a Brooks Feed representative or submit a request online using our interactive feeding guide for information. Growth monitoring of growing horses using a tape or scale is recommended.

A list of ingredients and full nutritional analysis is available by contacting the manufacturer.
