

Photo Finish

Textured

A blend of digestible fibres and multiple fat sources for sustained energy and stamina combined with a measured level of quick energy carbohydrates for speed and power with added pre and probiotics!

Features and Benefits

- ✓ Digestible sources of fibre and multiple fat sources provide stamina from *sustainable energy* while a perfect measured blend of *quick burning energy* from carbohydrates support speed and power where needed.
- ✓ High quality fats including soy oil, rice bran and flax supply sustainable calories for a championship performance and substantial health benefits from *Omega 3 fatty acids in flax*.
- ✓ A well-balanced level of vitamins and *chelated minerals* provide micronutrient fortification lacking in forages alone and eliminates the need for expensive supplements when fed at recommended levels.
- ✓ A full complement of *B Vitamins* including biotin supplies the daily maintenance requirements and a full spectrum of essential amino acids supplies protein for performance and muscle repair.
- ✓ Brooks **Oxiguard** System of natural source Vitamin E and organic selenium work synergistically as effective antioxidants to minimize muscle soreness and fatigue.
- ✓ A proprietary form of *Saccharomyces Cerevisiae* a *prebiotic and a probiotic* containing *Saccharomyces Boulardi* support overall digestive health by producing a healthy environment for intestinal microbes.

Photo Finish is a fixed formula manufactured in a *drug free* environment.

Photo Finish Description

Photo Finish is a cutting-edge feed that is a result of substantial research and technology. Photo Finish is formulated for horses active in high intensity disciplines requiring power and speed combined with the stamina to outperform the competition. Photo Finish derives energy from highly digestible fibre sources including beet pulp and multiple fat sources including flax, soy oil, and rice bran. Photo Finish also has the quick energy needed from carbohydrates to fuel the powerful bursts of speed needed to come out on top. The Brooks exclusive *Oxiguard* system of Natural Vitamin E and organic selenium helps to reduce muscle problems while the sustainable energy fat sources and “super fibres” provide substantial energy for championship performances. Prebiotic and probiotic sources help to sustain a robust population of microflora in the hind gut resulting in better health and nutrient utilization. Photo Finish provides total nutrition in a very palatable form that horses accept readily and stay on during intense training and competition.

Feeding Suggestions

Feed horses according to level and type of activity and to maintain ideal body condition

Mature Weight	900 lbs. (400 kg.)	1100 lbs. (500 kg.)	1320 lbs. (600 kg.)
Light work *	4.0 – 8.0 lbs. (1.8 - 3.6 kg.)	6.0 – 10.0 lbs. (2.75 - 4.5 kg.)	7.0 – 12.0 lbs. (3.2 - 5.5 kg.)
Moderate work **	5.0 – 10.0 lbs. (2.25 - 4.5 kg.)	7.0- 12.0 lbs. (3.2 - 5.45 kg.)	8.0 – 14.0 lbs. (3.6 - 6.40 kg.)
Heavy work ***	6.0 – 11.0 lbs. (2.70 - 5.0 kg.)	8.0 – 13.0 lbs. (3.6 – 5.9 kg.)	9.0 – 16.0 lbs. (4.0 - 7.25 kg.)

* ie. jogging, trail riding, pleasure etc.

** ie. dressage, jumping, cutting, roping etc.

*** ie. racing , polo, eventing etc.

Note: Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site.

Amount of feed required is dependent on the body condition, the metabolism and the type of activity that the horse is used for. For each pound of *Photo Finish* fed daily below $\frac{1}{2}$ pound per 100 pounds of the horse's bodyweight add $\frac{1}{4}$ pound (115 grams) *Brooks Enhancer* or *All Phase 20*. For specific feeding recommendations consult a Brooks Feed representative or submit a request online using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of the horse's bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to the quality of hay or pasture. Hay analysis is recommended to ensure a balanced ration.

A list of ingredients and full nutritional analysis is available by contacting the manufacturer.
