Zinc (act.)	130 ppm.
Vitamin A (min.)	11000 IU/KG.
Vitamin D (min.)	1100 IU/KG.
Vitamin E (min.)	220 IU/KG.
Selenium	.45 ppm.

◆ NSC (Optimized)

## Features and Benefits of Pro Sport Plus

Formulated with high quality protein and energy sources.

◆ While a blend of energy sources are included, rapidly available carbohydrates are emphasized to support maximum speed and power with beet pulp as a source of digestible fibre.

### Balanced vitamin and chelated mineral content

Supplies micronutrient fortification not found in forages and eliminates the need for expensive supplements. Chelated minerals are more readily and thoroughly absorbed for improved health and performance.

Manufactured with a proprietary form of Saccharomyces Cerevisiae a prebiotic with a wide body of research.

The addition of a proprietary yeast culture improves digestion of fibre and promotes more efficient use of nutrients.

Contains a full complement of B Vitamins and amino acids

Meets all of the daily maintenance requirements for B Vitamins including biotin and provides full spectrum of essential amino acids

### Formulation is fixed

A fixed formula means that we do not substitute inferior low cost ingredients for superior ingredients to lower the cost of production.

Pro Sport Plus is formulated with carefully selected ingredients including beet pulp to ensure maximum palatability and consistency.

# Pro Sport Plus

Pro Sport Plus is a high performance feed for horses active in high intensity disciplines requiring large amounts of energy. Pro Sport Plus draws energy primarily from carbohydrates but also from a substantial amount of highly digestible fibre sources called “super fibres” which help to reduce the carbohydrate load in the stomach. Pro Sport Plus also has added fat in the form of soy oil to substantially increase the overall energy level.

Pro Sport Plus has earned a reputation among many top trainers and owners for supplying total nutrition in a palatable form that horses take to readily and stay on during competition or training.

## Feeding Suggestions

Feed horses according to level and type of activity and to maintain ideal body condition.

Mature Weight	900 lbs. (400 kg.)	1100 lbs. (500 kg.)	1300 lbs. (600 kg.)
Light work *	4-9 lbs. (2.0-4.0 kg.)	6-11 lbs. (2.75-5.0 kg.)	9-12 lbs. (4.0-6.0 kg.)
Moderate work **	6-11 lbs. (2.75-5.0 kg.)	9-13 lbs. (4.0-6.0 kg.)	11-15 lbs. (5.0-6.75 kg.)
Heavy work ***	9-13 lbs. (4.0-6.0 kg.)	11-15 lbs. (5.0-6.75 kg.)	13-17 lbs. (6.0-7.75 kg.)

\* ie. jogging, trail riding, pleasure etc.

\*\* ie. dressage, jumping, cutting, roping etc.

\*\*\* ie. racing, polo, eventing etc.

*Note: Warmblood and Draft type horses may require different amounts from light horse breeds.  
Contact a Brooks feed representative or submit a request on our interactive web site.*

Amount of feed required is dependent on the body condition, the metabolism and the type of activity the horse is used for. For each pound of **Pro Sport Plus** fed daily below ½ pound per 100 pounds of the horse’s bodyweight add ¼ pound (115 grams) **Brooks Enhancer or All Phase 20**. For specific recommendations consult a Brooks Feed representative or submit a request on-line using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of the horse’s bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to the quality of hay or pasture. Hay analysis is recommended to ensure a balanced ration.

A list of ingredients is available by contacting the manufacturer.
