

Restore™ Paste

Buffered Electrolyte Paste for Horses

A carefully formulated paste electrolyte supplement designed to match the composition of sweat. Restore® Paste is an easy-to-administer product that includes a buffering agent designed to support gastrointestinal comfort in horses.

When horses sweat they lose electrolytes, with the principal losses being chloride, sodium, potassium, and magnesium. If these essential nutrients are not replenished, the consequences may include dehydration, muscular weakness, overheating, fatigue, and poor performance. The composition of Restore Paste mimics that of horse sweat so it replaces what has been lost from sweat.

Why should I use Restore Paste for my horse?

- ✓ For routine or strategic electrolyte replacement for all horses that sweat
- ✓ Supplies sodium, chloride, magnesium, and potassium to hard-working horses
- ✓ Easy-to-administer oral paste
- ✓ Stimulates thirst response and encourages horses to drink
- ✓ Nonirritating formula for gastrointestinal comfort

Administer one tube (60 g) after strenuous activity when the horse has been sweating. For best results during endurance training and competitions, administer Restore Paste during the ride at rest stops or at water stops on the trail, and after completion. An entire tube can be used with each administration during a competition.

Guaranteed Analysis per 60 g

Sodium	6,900 mg
Chloride	14,700 mg
Potassium	3,990 mg
Magnesium	510 mg
