

Phase I

Optimum safe growth
 for foals

(pelleted or textured)

A Kentucky Equine Research Formulated Feed

Fortified with Brooks exclusive
Oxiguard system of natural source
 Vitamin E and organic selenium!

Bioavailable Vitamin E and organic selenium
 work synergistically contributing significantly to
 strong healthy muscle development,

*Our commitment to quality
 drug free manufacturing is
 your satisfaction guarantee!*

Guaranteed Analysis

Crude Protein (min)	16 %
Crude Fat (min)	7 %
Crude Fibre (max.)	15 %
Calcium (act.)	1.0 %
Phosphorus (act.)	.80 %
Copper (act.)	55 ppm.
Zinc (act.)	155 ppm.
Sodium (act.)	.4 %
Vitamin A (min.)	13000 IU/KG.
Vitamin D (min.)	1650 IU/KG.
Vitamin E (min.)	200 IU/KG.
Selenium (min. added)	.45 ppm.

NSC level (Controlled) Nutritional profile of pelleted Phase I may vary slightly.

Features and Benefits of Phase I

Formulated with high quality protein and energy sources.

Provides ideal levels of amino acids to encourage safe growth with an appropriate calorie density for growing foals.

Formulated with highly digestible fibre and fat sources.

❖ *The positive effects of non NSC energy sources (fibre, fat) are maximized while a controlled level of soluble carbohydrates are included to fully support growth.*

Balanced with vitamins and chelated minerals.

Encourages sound skeletal growth and prevents developmental problems related to nutrition. Chelated minerals are more readily and thoroughly absorbed for improved performance and health.

Manufactured with a proprietary form of Saccharomyces Cerevisiae a prebiotic with a wide body of research.

The addition of a proprietary yeast culture improves digestion of fibre and promotes more efficient use of nutrients.

Contains a full complement of B Vitamins and amino acids

Meets all of the daily maintenance requirements for B Vitamins including biotin and provides full spectrum of essential amino acids

Textured and pelleted Phase I are formulated with carefully selected fixed formula ingredients to ensure maximum palatability and a smooth transition at weaning time.

Phase I Description

Phase I is a scientifically formulated growing ration suitable for foals and weanlings. Phase I is a result of substantial research undertaken to develop the best possible nutritional profile for growing horses prone to developmental orthopedic diseases. Phase I draws energy largely from highly digestible fibre sources called “super fibres” and high quality fat (primarily soy oil) with a controlled starch and sugar level in keeping with research illustrating the benefits of a “low glycemic” diet for growing horses. The mineral profile including organic (chelated) trace minerals provides highly available bone building nutrients to complement an ideal amino acid (protein) profile.

Phase I supplies total nutrition in a very palatable textured or pelleted form that foals and weanlings take to readily.

Feeding Suggestions

* Nursing foals (1-5 months) Maximum of 1.0 pound (.45 kg.) per month of age

Weanlings (6-8 months) .9 - 1.1 lbs. /100 lbs. bodyweight (.9-1.1 kg. /100 kg. bodyweight)

Weanlings (8-12 months) .8 - 1.0 lbs. /100 lbs. bodyweight (.8-1.0 kg. /100 kg. bodyweight)

Caution – Faster growing animals may be more susceptible to developmental orthopedic diseases. (DOD) Do not overfeed.

Note: Growing Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site.

Amount of feed required is dependent on the body condition, the metabolism and the rate of growth expected. Proper intake of minerals and vitamins is extremely important for growing horses. *Brooks Enhancer or All Phase 20 should be added to the ration when less than the recommended amount is fed.* Provide fresh clean water and free choice salt at all times in addition to a minimum of 1% of the horse’s bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to quality of hay. Hay analysis is recommended. Adjust the amount fed according to quantity and quality of pasture while ensuring adequate minerals and vitamins are provided. Consult a Brooks Feed representative or submit a request on-line using our interactive feeding guide for more information. Growth monitoring of growing horses using a tape or scale is recommended.

A list of ingredients is available by contacting the manufacturer.
