

Phase V

Fibre Fat Plus

**Controllable energy for
 the equine athlete**

(Pelleted or Textured)

A Kentucky Equine Research Formulated Feed

*Fortified with Brooks exclusive
Oxiguard system of natural source
 Vitamin E and organic selenium!*

*Bioavailable Vitamin E and organic selenium
 work synergistically as effective antioxidants to
 minimize muscle soreness and fatigue.*

*Our commitment to quality
 drug free manufacturing is
 your satisfaction guarantee!*

Guaranteed Analysis

Crude Protein (min)	12 %
Crude Fat (min)	8 %
Crude Fibre (max.)	15 %

Vitamin D (min.)	1100 IU/KG.
Vitamin E (min.)	200 IU/KG.
Selenium (min. added)	.45 ppm.

❖ *NSC level (controlled) Nutritional profile of pelleted Phase V may vary slightly.*

Features and Benefits of Phase V

Formulated with highly digestible fibre and carefully controlled starch and sugar (NSC) ingredients.

❖ *The positive effects of non NSC energy sources (fibre, fat) are maximized while controlled soluble carbohydrates are included to fully augment athletic achievement or growth.*

Balanced vitamin and chelated mineral content

Supplies micronutrient fortification not found in forages and eliminates the need for expensive supplements. Chelated minerals are more readily and thoroughly absorbed for improved health and performance.

Manufactured with a proprietary form of Saccharomyces Cerevisiae a prebiotic with a wide body of research.

The addition of a proprietary yeast culture improves digestion of fibre and promotes more efficient use of nutrients.

Contains a full complement of B Vitamins and amino acids

Meets all of the daily maintenance requirements for B Vitamins including biotin and provides full spectrum of essential amino acids

Formulation is fixed

A fixed formula means that we do not substitute inferior low cost ingredients for superior ingredients to lower the cost of production.

Textured and pelleted Phase V are formulated with carefully selected ingredients to ensure maximum palatability.

Phase V Description

Phase V is a fibre and fat based feed suitable for horses competing in a variety of demanding equine disciplines. The low glycemic, controlled NSC (starch & sugar) formula with 8% fat makes Phase V an excellent choice for horses competing in disciplines requiring large amounts of controllable energy. Phase V draws energy primarily from high quality fibre sources without “filler fibres” common in lower quality feeds while the added fat substantially increases the energy level. The controlled NSC formula also helps reduce muscle problems while providing substantial energy for performing, weight gain or training.

Phase V supplies total nutrition in a textured or pelleted form that horses take to readily and stay on during training, competing or pleasure riding while outperforming comparably priced competitive products.

Feeding Suggestions

Feed horses according to level and type of activity and to maintain ideal body condition.

Mature Weight	900 lbs. (400 kg.)	1100 lbs. (500 kg.)	1300 lbs. (600 kg.)
Light work *	4-9 lbs. (2.0-4.0 kg.)	6-11 lbs. (2.75-5.0 kg.)	9-12 lbs. (4.0-6.0 kg.)
Moderate work **	6-11 lbs. (2.75-5.0 kg.)	9-13 lbs. (4.0-6.0 kg.)	11-15 lbs. (5.0-6.75 kg.)
Heavy work ***	9-13 lbs. (4.0-6.0 kg.)	11-15 lbs. (5.0-6.75 kg.)	13-17 lbs. (6.0-7.75 kg.)

* ie. jogging, trail riding, pleasure etc.

** ie. dressage, jumping, cutting, roping etc.

*** ie. racing, polo, eventing etc.

Note: Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site.

Amount of feed required is dependent on the body condition, the metabolism and the type of activity the horse is used for. For each pound of **Phase V** fed daily below ½ pound per 100 pounds of the horse’s bodyweight add ¼ pound (115 grams) **Brooks Enhancer or All Phase 20**. For specific recommendations consult a Brooks Feed representative or submit a request on-line using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of the horse’s bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to the quality of hay or pasture. Hay analysis is recommended to ensure a balanced ration.

A list of ingredients is available by contacting the manufacturer.
