## Performance Horse Feeds

“My name is Jennifer Perrin, I’m a 22-year-old amateur rider on the trillium and A circuit. I own Allissa THF (Harlie) who is a 16.3hh 8-year-old Oldenburg GOV mare. Not expecting to buy another horse, I came across her randomly through a friend and I knew I had to bring her back to Lake House Stables where my other horses are kept. I got Harlie in very rough condition where she was left unhandled for years in a paddock. Her feet were so long she couldn’t move properly and her coat and weight were in poor condition. I knew she needed high quality feed to have her looking and feeling her best. After doing some research and speaking to other professionals in the industry, I concluded that I should be using Brooks Feeds. They put me in contact with Laurie Bishop who is one of their fabulous nutrition advisors. Laurie came up with a plan using Fibre O, All Phase 20, Flax Appeal, salt, Joint Armor and Neighlox for Harlie. On top of the proper nutrition, she gets regular PEMF therapy from Pulsed Energy Therapy and Sales to make sure her cells are absorbing all the nutrients and keep her muscles feeling great. The difference shown in the pictures is only 7 weeks apart from the day I got her. Not only is my mare looking her best but feeling it too. Thank you, Laurie and Brooks Feeds in Port Perry, for making my horse blossom into a beautiful girl!”
