

# Parkwood Stables

## Quality Breeding Training and Showing

Every detail is covered at the beautiful 100-acre facility near Rockwood Ontario known as Parkwood Stables. Large box stalls, individual and group daily turnout into spacious grass paddocks indicates a first class facility. Ted and Elaine Parkinson operate the farm along with their daughter Cassie.

Parkwood Stable breeds Hanoverian and Canadian Warmblood horses, which are expertly trained by Inga Hamilton. Inga is a native of Germany where she apprenticed with Helga & Hans Joachim Koehler for 3 years. In the 20 years Inga has been in Canada she has shown Dressage up to Grand Prix. She is very involved in with the Hanoverian breed both in Germany and as the President of the Hanoverian Breeders Club of Eastern Canada. Inga's students have shown up to Upper Level Dressage and one student was part of the Canadian Team at the Paralympics in Athens.

No less meticulous attention is paid to the nutrition of the Parkwood horses. All the hay is home grown and as they are proud to advertise they only use the best feeds in their stable. Of course the best feeds are from Brooks including *Phase II, Phase V, All Phase 20 and Flax Appeal*. Just as important is the regular advice and guidance they receive from Brooks representative Laurie Clarke and regular service from Brooks dealer Jones Feed Mill.

An example of the quality of the Parkwood breeding is the 2008 filly *Falene* by Canadian Warmblood stallion Cabardino and out of the mare Miss Disney by Nickelson B. Falene was the Grand Champion at the 2008 Warmblood Breeder's Show winning the foal, the weanling, the junior championship and the finally the Grand Championship.

*Falene* is shown with the CWB mare Miss Disney ably handled by Inga, Elaine and Cassie.

Superior breeding, expert handling and training combined with careful attention to fine details such as nutrition are the ingredients for success at Parkwood Stables. Brooks is proud to be part of the nutritional management team at this excellent facility.
