

TECHNICAL REVIEW SHEET

Bio-Bloom™

Hoof and coat conditioner for horses

Bio-Bloom is a dual-action supplement designed to promote and maintain healthy hooves and skin from the inside out. Bio-Bloom contains biotin, methionine, iodine, and chelated zinc at levels shown to improve hoof growth, including development of strong hoof wall. Bio-Bloom includes lecithin and essential fatty acids from full-fat soybean, ingredients that are necessary for production of resilient hoof horn and shiny coats.

Elite Advice

"I trust Bio-Bloom to give my horses eye-catching, glowing coats and health sound hooves for a competitive advantage."

Karen O'Connor, Two-time Olympic Medalist

Features and Benefits

- Contains biotin, methionine, iodine, chelated zinc at levels shown to improve and speed hoof growth, including development of strong hoof wall
- Soft, shiny coat and healthy growth of mane and tail
- Increases health of hooves damaged by laminitis, seedy toe, sand cracks, and wet-dry cycles
- Includes essential amino acids and fatty acids, important ingredients for optimal coat condition.

Feeding Recommendations

Top-dress on feed. Feed 30 g to 60 g per day to horses and ponies. Feed 60 g per day for treatment of acute hoof damage and coat conditioning. Feed 90–120 g to horses recovering from laminitis.

Servings and Container Sizes

Serving size:

30 g scoop included

Container sizes:

2kg (66 servings), 10kg (333 servings)

Guaranteed Analysis

Nutrient	per 30g
Methionine	3,000 mg
Zinc	200 mg
Iodine	2 mg
Biotin	20 mg
