

Brooks nutrition supports broodmare!

“We have been feeding our horses Brooks Feeds for 3 years now, including broodmares, young stock, and adults. The Brooks representatives have always been very helpful in designing individual feed programs for each horse. “Jewel” arrived to our farm in October 2022, 5 months pregnant. With the help of Laurie Bishop, she has gained weight. Her coat is shiny and soft and her overall general health and demeanour has improved.”

We love our Brooks Feed!
