# Power Play Description

Power Play is a cutting-edge feed that is a result of substantial research and technology. Power Play is formulated for horses active in high intensity disciplines requiring power and speed combined with the stamina to outperform the competition. Power Play derives energy from highly digestible fibre sources including beet pulp and multiple fat sources including flax, soy oil, and rice bran. Power Play also has the quick energy needed from carbohydrates to fuel the powerful bursts of speed needed to come out on top. The Brooks exclusive *Oxiguard* system of Natural Vitamin E and organic selenium helps to reduce muscle problems while the sustainable energy fat sources and “super fibres” provide substantial energy for championship performances.

Power Play provides total nutrition in a very palatable form that horses accept readily and stay on during intense training and competition.
