# EEZE (Un-Ti)

Textured

Reduced NSC, high fibre and fat for everyday fitness and health

## Features and Benefits

✓ **A reduced level of sugar & starch** with an emphasis on non NSC sources such as fat and fibre make EEZE an excellent choice for disciplines requiring a high calorie density and maximum stamina.

✓ EEZE is formulated based on research conducted on horses prone to tying up. EEZE is a proven and effective choice for **RER, PSSM and other metabolic conditions**.

✓ A well-balanced level of vitamins and **chelated minerals** provide micronutrient fortification lacking in forages alone and eliminates the need for expensive supplements when fed at recommended levels.

✓ A full complement of **B Vitamins** including biotin supplies the daily maintenance requirements and a full spectrum of essential amino acids supplies protein for performance and muscle repair.

✓ Brooks **Oxiguard** System of bioavailable Vitamin E and organic selenium work synergistically to minimize muscle soreness and fatigue.

✓ A proprietary form of *Saccharomyces Cerevisiae*, a **probiotic** with a wide body of research improves digestion of fibre and promotes more efficient use of nutrients.

*EEZE is manufactured in a drug free environment with strict feed safety protocols!*

# EEZE Description

EEZE is a performance feed for horses active in high intensity disciplines requiring large amounts of energy with a reduced carbohydrate level. EEZE draws energy primarily from digestible (super) fibres and high-quality fats including rice bran. The low glycemic formula of EEZE makes it a good choice for horses prone to *Cushings*, *RER (Recurrent Exertional Rhabdomyolysis)*, *PSSM (Polysaccharide Storage Myopathy)*, or *laminitis*, particularly where weight gain is desired in a reduced non-structural carbohydrate formula.

EEZE has earned a reputation among many top trainers and owners for supplying low glycemic energy with complete balanced nutrition in a palatable form that keeps horses training every day.

## Feeding Suggestions

Feed horses according to level and type of activity and to maintain ideal body condition

**Contact a Brooks Feed representative or submit a request on our interactive web site.**

The amount of feed required depends on the body condition, the metabolism, and the type of activity the horse is used for. For each pound of **EEZE** fed daily below ½ pound per 100 lbs. bodyweight, add ¼ pound (115 grams) **Brooks Enhancer or All Phase 20**. For specific recommendations consult a Brooks Feed representative or submit a request online using our interactive feeding guide. Always provide fresh clean water and free choice salt with a minimum of 1% of bodyweight in hay or equivalent pasture. Store in a cool dry location. The amount fed varies according to quality of hay or pasture. A hay analysis is recommended. Contact your retailer or Brooks Nutrition Advisor.
