Fibre O Plus Description

Fibre O Plus is a high-performance feed for active horses requiring large amounts of energy with a reduced carbohydrate (NSC) level. Fibre O Plus draws energy primarily from digestible (super) fibres including beet pulp, and multiple fat sources including flax and rice bran. The low glycemic, high calorie formula of Fibre O Plus makes it an ideal feed for horses where weight gain is desired in a reduced NSC formula.

Fibre O Plus supplies manageable energy with complete balanced nutrition in a palatable form that keeps horses training or showing to their maximum ability.
