Leading Edge

Pelleted

High quality fibre, multiple fat sources and controlled NSC for the demanding needs of training and performance

Features and Benefits

- ✓ A **controlled starch and sugar** level, with highly digestible fibre and multiple fat sources provide a high level of energy, ideal for the demands of intense competition and training.
- ✓ Formulated with **stabilized flax and rice bran**. Flax and rice bran are calorie dense energy sources that provide calories, digestible fibre and Omega 3 fatty acids from flax.
- ✓ A well-balanced level of vitamins and chelated minerals provide micronutrient fortification lacking in forages alone and eliminates the need for expensive supplements when fed at recommended levels.
- ✓ A full complement of B Vitamins including biotin supplies the daily maintenance requirements and a full spectrum of essential amino acids supplies protein for performance and muscle repair.
- ✓ Brooks **Oxiguard** System of natural source Vitamin E and organic selenium work synergistically as effective antioxidants to minimize muscle soreness and fatigue.
- ✓ A proprietary form of *Saccharomyces Cerevisiae*, a **probiotic** with a wide body of research improves digestion of fibre and promotes more efficient use of nutrients.

Formulated with **BMCTM**
(Buffered Mineral Complex.)

Leading Edge is manufactured in a **drug free** environment with strict feed safety protocols!

Guaranteed Analysis

Crude Protein (min.)	13.00 %
Crude Fat (min.)	8.50 %
Crude Fibre (max.)	14.00 %

Leading Edge Description

Leading Edge pellet is a cutting-edge feed that is a result of substantial research and important technology. Leading Edge is formulated for horses that are active in high intensity disciplines requiring large amounts of energy. Leading Edge draws energy primarily from highly digestible fibre sources called “super fibres” and multiple fat sources including flax, soy oil, and rice bran. A controlled starch and sugar level makes it ideal for training young horses. The controlled NSC formula helps reduce muscle problems while the multiple fat sources and “super fibres” still provide substantial energy for active performance horses. *Horses actively racing or in training will benefit from BMC. Fewer injuries and gastric ulcers are potential real-life factors that could be significantly reduced with feeds formulated with BMC.* Leading Edge pellet supplies total nutrition in a convenient palatable form that horses take to readily and stay on during training and competition.

Feeding Suggestions

Feed horses according to level and type of activity and to maintain ideal body condition

Mature Weight	900 lbs. (400 kg.)	1100 lbs. (500 kg.)	1320 lbs. (600 kg.)
Light work *	4.0 – 8.0 lbs. (1.8 - 3.6 kg.)	6.0 – 10.0 lbs. (2.75 - 4.5 kg.)	7.0 – 12.0 lbs. (3.2 - 5.5 kg.)
Moderate work **	5.0 – 10.0 lbs. (2.25 - 4.5 kg.)	7.0 – 12.0 lbs. (3.2 - 5.45 kg.)	8.0 – 14.0 lbs. (3.6 - 6.40 kg.)
Heavy work ***	6.0 – 11.0 lbs. (2.70 - 5.0 kg.)	8.0 – 13.0 lbs. (3.6 – 5.9 kg.)	9.0 – 16.0 lbs. (4.0 - 7.25 kg.)

* ie. jogging, trail riding, pleasure ** ie. dressage, jumping, cutting, roping *** ie. Racing, eventing

Note: Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site.

The amount of feed required is dependent on the body condition, the metabolism, and the type of activity that the horse is used for. For each pound of **Leading Edge** fed daily below ½ pound per 100 pounds of the horse’s bodyweight add ¼ pound (115 grams) **Brooks Enhancer or All Phase 20**. For specific feeding recommendations consult a Brooks Feed representative or submit a request online using our interactive feeding guide. Provide fresh clean water and free choice salt at all times with a minimum of 1% of the horse’s bodyweight in hay or equivalent pasture. Store in a cool dry location. Amount fed varies according to the quality of hay or pasture. A hay analysis is recommended to ensure a balanced ration.
