Pro Sport Plus

Pro Sport Plus is a high-performance feed for horses active in high intensity disciplines requiring large amounts of energy. Pro Sport Plus draws energy primarily from carbohydrates but also from a substantial amount of highly digestible fibre sources called “super fibres” which help to reduce the carbohydrate load in the stomach. Pro Sport Plus also has added fat in the form of soy oil to substantially increase the overall energy level.

Pro Sport Plus has earned a reputation among many top trainers and owners for supplying total nutrition in a palatable form that horses take to readily and stay on during competition or training

Note: Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site.

The amount of feed required depends on the body condition, the metabolism, and the type of activity the horse is used for. For each pound of **Pro Sport Plus** fed daily below ½ pound per 100 pounds of the horse’s bodyweight add ¼ pound (115 grams) **Brooks Enhancer or All Phase 20**. For specific recommendations consult a Brooks Feed representative or submit a request online using our interactive feeding guide. Always provide fresh clean water and free choice salt with a minimum of 1% of the horse’s bodyweight in hay or equivalent pasture. Store in a cool dry location. The amount fed varies according to the quality of hay or pasture. A hay analysis is recommended to ensure a balanced ration.
