Brooks Senior

Textured

Complete Balanced Nutrition with highly digestible fibre, added fat, enhanced protein, and reduced NSC for Senior Equines

Features and Benefits

- ✓ **Enhanced protein level**, added fat and balanced nutrition with reduced NSC. Supports senior horses and contributes to more active, healthier, and longer lives.
- ✓ **High quality digestible fibre sources** including beet pulp, soy hulls and alfalfa meal help to ensure a healthy functioning digestive system while adding safe calories for effective maintenance of seniors.
- ✓ **Stabilized flax meal** is a rich source of Omega 3 fatty acids to enrich the hair coat, contribute to healthy hooves, support the immune system, and provide anti-inflammatory support. Rice bran is a good source of digestible fibre and fat.
- ✓ A proprietary form of **Saccharomyces Cerevisiae** and **Saccharomyces Boulardi** supports a robust population of hindgut microflora for hind gut health.
- ✓ Chelated minerals and total vitamin fortification including B Vitamins like biotin, complement what is lacking in forages. At recommended feeding rates no supplementation is necessary. Senior horses are better able to utilize minerals in a chelated form.
- ✓ **Brooks exclusive Oxiguard system** of natural source Vitamin E and organic selenium synergistically act as effective antioxidants to minimize muscle soreness and fatigue.

Senior is manufactured in a **drug free** environment with strict feed safety protocols!

Guaranteed Analysis

Crude Protein (min.)	14.00 %
Crude Fibre (max.)	15.00%
Crude Fat (min.)	8.00 %
Calcium (act.)	.90 %
Phosphorus (act.)	.55 %
Sodium (act.)	.40 %
Vitamin A (min.)	12000 IU/kg
Vitamin D (min.)	1200 IU/kg
Vitamin E (min.)	345 IU/kg
Copper (min.)	50 mg/kg
Manganese (min.)	125 mg/kg
Zinc (min.)	170 mg/kg
Selenium (min. added)	.55 mg/kg

Brooks Senior Description

Brooks Senior is formulated with enhanced levels of protein, highly digestible sources of fibre and a reduced starch and sugar (NSC) level. Brooks Senior is generously fortified with minerals and vitamins including chelated (organic) minerals which have improved absorption in a less efficient digestive system. Added fat in the form of flax, rice bran and soy oil raise the calorie density while beet pulp, soy hulls and alfalfa meal ensure a solid fibre intake for a healthy lower gut. The addition of probiotics ensures maximum utilization of nutrients to meet the needs of most aged horses.

Brooks Senior supplies total nutrition in a palatable textured format that horses take to readily and stay on while outperforming similar competitive products. Brooks Senior can be moistened for older horses with poor teeth or horses prone to choke.

Feeding Suggestions

Feed horses according to level and type of activity and to maintain ideal body condition

Mature Weight

Activity level	900 lbs (400 kg)	1100 lbs (500 kg)	1300 lbs (600 kg)
Light *	4.0 - 8.0 lbs (1.8 - 3.6 kg)	6.0 - 10.0 lbs (2.75 - 4.5 kg)	7.0 - 12.0 lbs (3.2 - 5.5 kg)
Moderate **	5.0 - 10.0 lbs (2.25 - 4.5 kg)	7.0 - 12.0 lbs (3.2 - 5.45 kg)	8.0 - 14.0 lbs (3.6 - 6.4 kg)

* ie. jogging, trail riding, pleasure ** ie. dressage, jumping, cutting

Note: Many senior horses have specific issues which require individual feeding programs targeted to their condition. For example, senior horses with Equine Metabolic Syndrome, Cushings, or Insulin Resistance should be appraised by a Brooks Nutrition Advisor.

Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site.

The amount of feed required depends on the body condition, the metabolism, and the type of activity the horse is used for. Add ¼ pound (115 grams) **Brooks Enhancer** or **All Phase 20** for each pound of **Brooks Senior** fed daily below the recommended amount. For specific feeding suggestions consult a Brooks Feed representative or submit a request online using our interactive feeding guide. Always provide fresh clean water and free choice salt with a minimum of 1.0 % of the horse's body weight in hay or equivalent pasture. Store in a cool dry location. The amount fed varies according to the quality of hay or pasture. A hay analysis is recommended to ensure a balanced ration.

A list of ingredients and full nutritional analysis is available by contacting the manufacturer.
