# Fit & Fibre

Pelleted

A complete ration with high quality fibre and added fat for use as a concentrate for horses needing a balanced ration with moderate manageable energy.

## Features and Benefits

- ✓ Fit & Fibre is the perfect blend of good quality fibre, fat and carbohydrates with a moderate caloric value for horses requiring moderate *controllable energy*.
- ✓ *Low glycemic* formula maximizes the positive effects of non NSC energy sources (fibre, fat) while controlled soluble carbohydrates are included to fully augment athletic achievement.
- ✓ A well-balanced level of vitamins and chelated minerals provide micronutrient fortification lacking in forages alone and eliminates the need for expensive supplements when fed at recommended levels.
- ✓ A full complement of *B Vitamins* including biotin supplies the daily maintenance requirements and a full spectrum of essential amino acids supplies protein for performance and muscle repair.
- ✓ Brooks *Oxiguard* System of natural source Vitamin E and organic selenium work synergistically as effective antioxidants to minimize muscle soreness and fatigue.
- ✓ A proprietary form of *Saccharomyces Cerevisiae*, a *probiotic* with a wide body of research improves digestion of fibre and promotes more efficient use of nutrients.

# Fit & Fibre Description

Fit & Fibre is a fibre and fat-based feed suitable for a wide range of horses. The low glycemic, controlled NSC formula with added fat makes Fit & Fibre an excellent choice for horses needing a moderate amount of controllable energy. Fit & Fibre draws energy primarily from high quality fibre sources without excessive “filler fibres” common in lower quality feeds and added fat to increase the energy level. Fit & Fibre supplies total nutrition in a palatable textured or pelleted form that horses take to readily and stay on during training, competing or pleasure riding while outperforming comparably priced competitive products.

## Feeding Suggestions

Feed horses according to level and type of activity and to maintain ideal body condition

### Mature Weight

Activity level	900 lbs (400 kg)	1100 lbs (500 kg)	1300 lbs (600 kg)
Light *	4.0 - 8.0 lbs (1.8 - 3.6 kg)	6.0 - 10.0 lbs (2.75 - 4.5 kg)	7.0 - 12.0 lbs (3.2 - 5.5 kg)
Moderate **	5.0 - 10.0 lbs (2.25 - 4.5 kg)	7.0 - 12.0 lbs (3.2 - 5.45 kg)	8.0 - 14.0 lbs (3.6 - 6.4 kg)

\* ie. jogging, trail riding, pleasure \*\* ie. dressage, jumping, cutting

*Note: Warmblood and Draft type horses may require different amounts from light horse breeds. Contact a Brooks Feed representative or submit a request on our interactive web site.*

The amount of feed required depends on the body condition, the metabolism, and the type of activity the horse is used for. For each pound of **Fit & Fibre** fed daily below  $\frac{1}{2}$  pound per 100 pounds of the horse's bodyweight add  $\frac{1}{4}$  pound (115 grams) **Brooks Enhancer or All Phase 20**. For specific feeding suggestions consult a Brooks Feed representative or submit a request online using our interactive feeding guide. Always provide fresh clean water and free choice salt with a minimum of 1% of the horse's bodyweight in hay or equivalent pasture. Store in a cool dry location. The amount fed varies according to the quality of hay or pasture. A hay analysis is recommended to ensure a balanced ration.

A list of ingredients and full nutritional analysis is available by contacting the manufacturer.
