BALANCED SUPPORT FOR MATURE HORSES

- **A Complete Forage Partner** – Highly digestible source of protein, vitamins, and minerals to complement hay or pasture.
- **Nutrient-Dense with reduced NSC (Non-Structural Carbohydrates)** – Supplies essential nutrients without unnecessary calories; an excellent choice for horses prone to weight gain or metabolic issues.
- **Enriched with organic minerals** for superior absorption, improved bioavailability, and more effective nutrient use.
- **Flexible Feeding Options** – Can be fed alone, blended with plain grains, or used as a top-dress when complete feeds are fed at lower rates.
- **Lower Protein Ration Balancer** – Ideal for mature horses who are on pasture and/or eating a good quality forage.

BROOK'S ENHANCER IS MANUFACTURED IN A DRUG FREE ENVIRONMENT

ENHANCER RATION BALANCER

FEEDING GUIDELINES

NOTE: These feeding guidelines are based on feeding **Brook's Enhancer Ration Balancer** with a high-quality forage. Nutrient content in forages can vary. Incorporating a Ration Balancer into the feeding program helps maintain a balanced daily nutrient intake. **Enhancer Ration Balancer** is designed for mature horses able to maintain body weight and condition on high quality hay or pasture alone. **Brook's Enhancer** is a concentrated source of vitamins and minerals to complement and fortify hay or pasture. Because vitamin and mineral levels in forages can vary, incorporating a ration balancer into the feeding program helps ensure a consistent and balanced daily nutrient intake. **Brook's All-Phase® Ration Balancer** is recommended instead of **Brook's Enhancer Ration Balancer** when forage is low to moderate quality.
