BALANCED SUPPORT FOR GROWTH, PERFORMANCE & WELLNESS

- **With increased protein, vitamins, and minerals, the new formula** provides more nutrition in every scoop, allowing for a lower feeding rate.
- **Practical & Versatile** – Ideal for all lifecycles, from growing and breeding stock to metabolically challenged horses.
- **A Complete Forage Partner** – Highly digestible source of protein, vitamins, and minerals to complement hay or pasture.
- **Nutrient-Dense with reduced NSC (Non-Structural Carbohydrates)** – Supplies essential nutrients without unnecessary calories; an excellent choice for horses prone to weight gain or metabolic issues.
- **Buffered Mineral Complex (BMC™)** is a source of highly bioavailable, marine- derived calcium and essential trace minerals, formulated to support optimal gastrointestinal and skeletal health.
- **Enriched with organic minerals** for superior absorption, improved bioavailability, and more effective nutrient use.
- **Performance & Recovery** – Provides amino acids and antioxidants to build muscle, support repair, and promote a shiny coat.

ALL-PHASE® RATION BALANCER

FEEDING GUIDELINES

NOTE: Feed horses according to the level and type of activity and to maintain ideal body condition. Brook's All-Phase Ration Balancer is designed to be fed alone with forage or as a top-dress with other feed products. For horses that do not meet the expected mature weight, feeding rates for mature horses at maintenance can be estimated based on **0.1 – 0.2 lbs of Brook's All Phase Ration Balancer, and 2.0 lbs of hay and or pasture per 100 lbs of body weight per day** [REFER TO FEEDING GUIDELINES BELOW]. The additional calories and nutrient demands of horses in more work may be better met by adding a higher-calorie, balanced Brook's product designed for performance horses.
